

# Safety as Your Secret Weapon

## 2020 Safety Pays Seminar Series

Keeping up on all the current environmental health and safety regulations can be overwhelming. We've developed a turnkey series of seminars that will help you get the edge! Our team of experts will share with you the secrets: How to create a strong safety culture that reduces your risk and exposure, while ultimately paying back a healthy return. Once you hear the facts, you will see a more clear pathway to take immediate, positive steps for your company.

### Seminar Topics Include (Schedule on back):

#### Building a Strong Safety Culture

Making safety a part of your company's CULTURE is the SECRET SAUCE to better job satisfaction, productivity, retention, and morale! Learn strategies to help you build a positive safety culture.

#### OSHA at the Door

Decades in the regulatory business has taught us that most companies are NOT PREPARED for a regulatory agency visit. Hear what's at stake from our former investigators and how you can get ready.

#### Business Case for Safety

Every dollar invested in safety gets your company a \$4 to \$6 RETURN. However, this often gets lost in industry jargon. Our experts will demystify this for you so you can capture the benefit more easily.

#### Environmental & Industrial Hygiene Compliance Basics

It's overwhelming for most businesses to navigate both OSHA and MPCA/EPA compliance requirements. Our experts will help you understand what your company is required to do and a STRAIGHTFORWARD PATHWAY to compliance.

*Seminars are engaging, interactive, and packed with useful information. Delivered by OECS associates who are professionals in their specific fields.*
