

Electrical Safety-Related Work Practices

The Latest NFPA 70-E and OSHA Rulings You Need to Know

Workplace Safety Webinar Series
Thursday, July 22, 2021 – 11 AM to Noon
[Click Here to Register](#)

Over the past five years over 700 employees died at work from electric contacts and exposures. Half were working in construction. The next largest group was installation, maintenance, production and repair occupations, which accounted for 38% of electrical fatalities. This highlights the wide variety of industries where workers are potentially at risk.

Do you have employees who work with electricity? From resetting circuit breakers to replacing electrical components – they all need electrical safety-related work practices. Learn more about the latest NFPA 70-E and OSHA rulings that are designed to protect your employees and help eliminate fatalities and serious injuries.

This free webinar will cover key topics like:

- How lockout tagout and electrical safety-related work practices are both required to protect employees.
- What is an electrical safe work condition? How to determine safe working distances for shock and arc blast hazards.
- The latest labeling requirements.
- What to consider when selecting and maintaining the required electrical personal protective equipment.
- What is touch safe? How to manage electrical contractors.

Join us for the inside track from your OECS safety experts.

WHO

This event is for business owners, presidents, safety, HR and plant management, construction superintendents and project managers.
