

# Power Up Your Safety Culture for 2022! Learn How to Take It to the Next Level

**Workplace Safety Webinar Series – Thursday, Nov. 18, 2021, 11:00 to Noon**  
**[CLICK HERE TO REGISTER](#)**

Did you know a strong safety culture can pave the way to helping your company save money, boost morale, increase retention and improve productivity?

According to OSHA, strong safety programs can reduce injury and illness costs by 20-40%. Further, every dollar invested in effective safety programs allow a company to save \$4-\$6, as illnesses, injuries and fatalities decline.

In today's business environment, these safety-related costs can be the difference between reporting a profit or loss!

That's one more reason why OECS is passionate about inspiring strong safety cultures. In this

webinar, based on the book, *Safety 24/7*, by Greg Anderson, you'll learn 6 strategies to help you bring your safety culture to the next level, including how to:

- Define your safety culture and integrate it throughout your company.
- Move from a "compliance" approach to making safety a core value that supports your culture.
- Identify and address the common barriers to creating a strong safety culture.
- Gain management buy-in and become a leader in safety.

Join us for this free webinar and learn how to gain the safety edge!
