

OSHA at the Door: Be Prepared

[Register](#)

Thursday, April 20, 2023 – 11:00 am to 12:00 pm

Continuing
Education
(CE) credit

Decades in the safety business have shown us that most companies are NOT PREPARED for an OSHA visit. Amidst the challenges of keeping workers safe during normal times, increased regulatory funding has added another layer of complexity to managing safety in the workplace.

Due to additional funding, OSHA increased the number of investigators which has led to a record number of inspections at all types of workplaces.

What if an inspector turns up at your door? How would you handle it? It can happen anytime with no advance warning.

This free webinar will help you better protect your employees and make a huge difference in how your company fares with an OSHA inspector visit.

You will learn how to:

- Be prepared! We'll cover why having a Safety Plan is so important.
- Train your leadership team and key employees on how to seamlessly handle an OSHA visit.
- Utilize best practices, avoid costly fines and handle a follow-up visit successfully.
- Q & A with the former MNOSHA staff!

Join us for the inside track from your OECS workplace safety experts!

This session has been approved to meet continuing education requirements for 1 contact hour. Contact hours are designed to meet BCSP, ABIH and ABOHN requirements for certification. The participant is responsible for determining whether this activity meets the requirements of their certifying agency or licensing board.

WHO

This event is for business Owners, Presidents, Safety/HR Personnel, Plant Management, Construction Superintendents, Project Managers, and Foreman!
