

LEARNING MANAGEMENT SYSTEM (LMS)

Part of Your Total Safety Solution

ACHIEVE YOUR SAFETY GOALS

LMS can be an essential tool in your safety program. Our platform is designed to provide the user with multiple training options to meet a variety of needs. Through customized video sessions and interactive eLearning modules, the learner can focus on gaining the knowledge they need on various topics. We believe that engaged learning drives safety champions.

WHAT'S INCLUDED

- Video trainings – short 15 to 20-minute training sessions
- eLearning training modules – interactive learning experiences
- Spanish available for most content – see list on back
- Unlimited courses – see list on back
- Rosters available
- Set up, reports, tracking and administration
- New Hire Orientation video trainings
 - Short 5–10-minute sessions providing a general overview of the standard
